If we get gas, a column could be erected and the public square illuminated. If we do not get gas, we may obtain water, and in that case can erect a fountain, which, at least will be ornamental. Any money spent on an experiment is money spent on an experiment. It is a waste of gas or water will not be lost. Shortly after the first passage at arms, the father and an elder brother returned to clean out the ranch, and while the old man carried the principal of the schools, Mr. Rodgers, the brother got out his knife and prepared to do a little carving. At this trying moment Miss Henderson stood desert the flag, but arming herself with a poker, drove the would be butcher into a corner and kept him there until Rodgers was ready to dump him out of doors, which he finally did in the most approved style. Gone to Florida.

Mr. E. E. Donaldson, who left for Florida January 8th, contemplates making that State his future home. We regret to lose him, because he was a young man of excellent character and highly esteemed by all who knew him. The friends he makes in the South will find him a pleasant neighbor, a good citizen and a Christian gentleman. Words cannot express our regret at his departure, but wishing him success and prosperity in all future undertakings, we will add, may the God of our fathers go with him.

The Guide Post.

The bright, intelligent pupils of Miss Saumen's school have been the publication of a school paper, in manuscript, entitled "The Guide Post," the initial No. of which is before us.

The Guide Post is in imitation of the newspaper, and is made up of literary selections and original contributions, editorial comments upon current topics, happenings local to the school, and advertisements of firms in the possible future.

The literary excellence of the Guide Post is highly creditable to the young editor and his staff of able contributors, and we bespeak for it a useful and long and happy existence.

Depot Policeman.

Some time ago Mr. Carr, of the C. H. V. & T. R. R., appointed Mr. Whalen of Sand Run as Depot Policeman at Logan. The Council refused to confirm the appointment on the ground that the law requires that the police man shall be an elector of the village, which Whalen is not. He is a worthy man and would make a good official, but our Council hold that he is barred from the position by the statute. Marshal Deishley was an applicant, but has lately withdrawn his application. A number of other very deserving men of our town are applicants for the place, and the appointment of any one will be confirmed by our Council. We hope the delay will not be long continued. A policeman is needed at the depot.

Bridge Goes Down.

An employee of J. J. Snyder, the saw mill man, fell a tree on the iron railroad bridge across Old Town Creek, one mile east of this city, yesterday morning. Due regard for the safety of the bridge had been made, but it seems the tree was hollow in the butt and fell directly opposite to what was expected and took out one chord as it went down. Passengers on the afternoon train were transferred at the scene of the accident and taken on to Columbus by Tom Galvin's "cannon ball train" of the Straitsville branch.

The track of the O. & W. V. Division crosses at this point, and that bridge will be used until the main line bridge is repaired.

Trains are now running on time.

The Mine Explosion.

WHEELING, Jan. 24.—The Intelligence Newburgh special says a local official here has been formed, with Mayor Ellis as treasurer, assisted by prominent citizens and clergymen, and about \$400 was raised in the town. The families are all poor and needy, all the men having been in debt. Since yesterday eleven more bodies have been found and identified, making fourteen so far recovered.

The names of those identified are: George Weir, John Lambert, John Edwards, George Higgins, Thomas Guy, John Conner, Charles Tunley, Clinton Albright, Harry Guy, Richard Bentley and Nicholas Bentley. As the bodies were recovered at the top of the shaft they were taken care of by the coroners jury for identification and then turned over to the undertaker. The bodies were found in various positions, some with arms extended as if about to pursue their usual work, and others with arms and limbs contracted as if in awful agony. All were terribly burned and blackened, and their distorted features told of their terrible sufferings, but none were so mutilated as the three that were discovered yesterday. One was found, face down, with his head on his arm as if he had escaped the violence of the explosion, and assumed that position in hope of finding sufficient air to prolong his life until rescued. But this theory is contradicted by practical miners, who think the men were all killed by the explosion. It is now thought that the bodies will be recovered by tomorrow evening.

PAUPERS ROASTED.

Five of Forty Inmates Perish in a Midnight Fire.

SURVIVORS GOT OUT ON THE SNOW COVERED GROUND NAKED.

The Temperature Being Ten Degrees Below Zero.

JACKSON, Mich., Jan. 21.—The county house burned at 1 o'clock this morning. There were forty-five inmates. All escaped but five, who perished in the flames. Their remains were brought to the city today.

The people who perished were: Dolly Martin, aged sixty, insane, an inmate for twelve years; Kate Avery, aged seventy, an inmate for ten years; Jane Atkins, aged seventy, insane, an inmate for ten years; Zina Boynton, aged ninety-two, deaf; Charles Elliot, aged seventy-two, blind.

The building is situated in a lonely spot about four miles from the city. It was recently built at a cost of \$12,000. The fire caught in some unknown manner in the inmate's kitchen. The whole interior was destroyed.

The thermometer at the time registered 10° below zero. All the inmates lost their clothing. Thirty of the paupers were brought to the city and housed. Some of them will die from exposure.

John Doherty, the hired man, brought three of the insane down a fire-escape in his arms and saved their lives. An inmate boy, nineteen years old, was found in bed, fire falling on his back, and rescued by the means of the fire escape. There were only two men besides the inmates about the place when the fire broke out, and they rescued the inmates before help arrived.

William Mills, one of the inmates, was the first man to issue Sande's Spelling Book. He was at one time worth a quarter of a million dollars.

MINERS MEETING.

Resolutions Adopted.

To the Hocking Sentinel, Logan, O.

At a meeting of miners and mine laborers held on the 20th inst., the undersigned committee were appointed and ordered to publish the following:

1. Prices regulating the working of Entries.

2. Desirability of two (2) week's pay.

3. Consideration of Contractors and Contract System.

4. Miscellaneous business.

After considerable discussion, the first three questions were referred to a District Convention, which was ordered called immediately.

When Judge Thurman rendered his decision favorable to the miners, it was generally supposed that all branches of labor in and around the mines would be correspondingly advanced, but this has not been the case. The operators refused to advance the prices of yard entries, and in one mine they refused to pay robate of ten cents a ton, which should be paid as per agreement, from the 23rd of November, 1885.

We favor being paid every two weeks. One of our operators and a good one, W. R. Reid, pays twice a month. Operators in the Sunday Creek Valley, the District immediately next to ours, pays twice a month. The Truck system is pretty near as lively here as ever. Some company stores use account books, some use checks, and another is carried on under a rather novel plan; no doubt intended to evade the law. The customer when he enters the store goes to one clerk and orders his goods, and receives from him a slip of paper with the price of his goods marked thereon; he takes to another clerk at another part of the store, and receives in money if he has it earned, to the amount marked on the slip, this money he takes to the clerk who waited on him in the first instance, then he can take his goods and go. A strong and better feeling prev
